

Class_5_SQL_All_Procedures

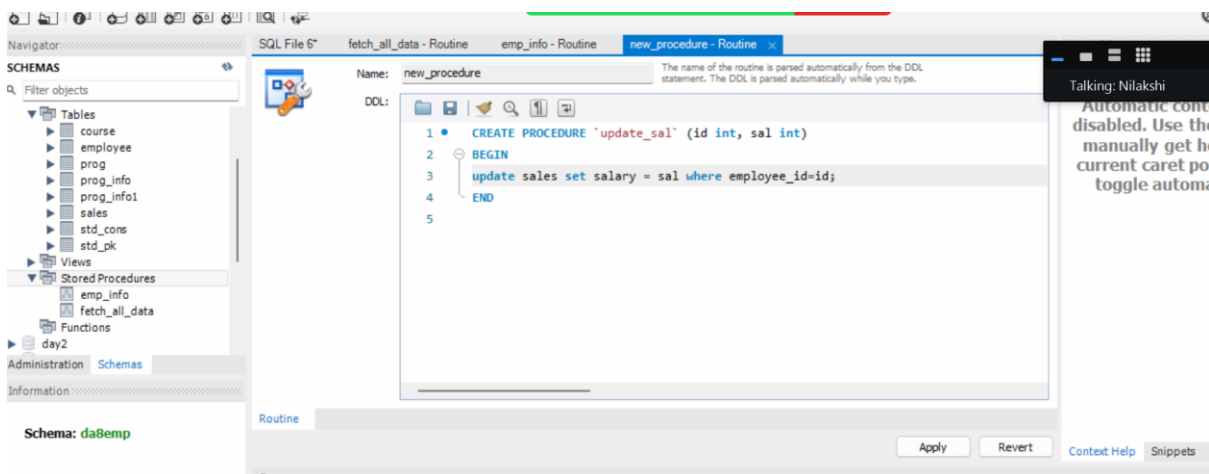

1. Fetch_all_data

2. Emp_info

3. Update_sal

4. status

The screenshot shows a SQL IDE with a left sidebar displaying a database schema tree for 'HEMAS'. The 'Stored Procedures' folder is expanded, showing 'emp_info', 'fetch_all_data', 'status', and 'update_sal'. The main editor window is titled 'SQL File 6*' and shows the definition of the 'status' routine. The 'Name' field is 'status' and the 'DDL' field contains the following SQL code:

```
1 • CREATE DEFINER='root'@'localhost' PROCEDURE `status`(i int)
2 BEGIN
3     declare s int;
4     select salary into s from sales where employee_id=i;
5
6     if s>60000 then
7         update sales set sal_status="High" where employee_id=i;
8     elseif s>50000 then
9         update sales set sal_status="Medium" where employee_id=i;
10    else
11        update sales set sal_status="Low" where employee_id=i;
12    end if;
13
14 END
```

The status bar at the bottom indicates 'Schema: da8emp'.

5. bonus_it_hr

The screenshot shows the same SQL IDE with the 'bonus_it_hr' routine selected in the 'Stored Procedures' list. The main editor window shows the definition of the 'bonus_it_hr' routine. The 'Name' field is 'bonus_it_hr' and the 'DDL' field contains the following SQL code:

```
1 • CREATE DEFINER='root'@'localhost' PROCEDURE `bonus_it_hr`()
2 BEGIN
3
4     select *, case
5         when department="IT" then Salary+5000
6         when department="HR" then salary+5000
7     else
8         0
9     end as Bonus
10    from sales;
11 END
```

The status bar at the bottom indicates 'Schema: da8emp'.

6. status_all

The screenshot shows the same SQL IDE with the 'status_all' routine selected in the 'Stored Procedures' list. The main editor window shows the definition of the 'status_all' routine. The 'Name' field is 'status_all' and the 'DDL' field contains the following SQL code:

```
1 • CREATE DEFINER='root'@'localhost' PROCEDURE `status_all`()
2 BEGIN
3
4     declare i int default 1;
5
6     while i<=30 do
7         call status(i);
8         set i=i+1;
9     end while;
10
11 END
```

The status bar at the bottom indicates 'Schema: da8emp'.
